Mr. Bluey produces 14-15microns white fleece with low condition & vegetable matter. The fleeces have long fibre length and strong staples.

Price: \$75 (price at back sheep to the sale)

Get to know your very fine wool

MICRON COUNT - Wool Quality

Merino wool comes in several qualities dependent on the micron count of fibre. Commonly 15-17.5 microns are known as Ultra-fine merino. At "Casalana" our sheep produce 13-15 micron fleeces.

Most commercial ultra fine fleeces are produced form casing the sheep to obtain clean and fine fibre. This is not Casalana practice. We nurture our sheep on the open pasture field.

For Casalana wool, contact Nui at Phone 95257085 or Email nuimilton@westnet.com.au
